Dear Mr. Phillips,

I enclose the Americans for Prosperity No Climate Tax Pledge, signed by former Congressman Dick Zimmer, the Republican candidate for the U.S. Senate seat in New Jersey presently occupied by Senator Frank Lautenberg.

Congressman Zimmer supports a market-driven cap-and-trade mechanism for reducing greenhouse gases, but has expressed concern on numerous occasions that an auction of allowances may be used to generate massive additional funds which will be utilized to grow the federal government.

Very truly yours,

Mark Duffy
